

## Checkfire Ltd

Commercial,  
Workplace Design & Build

# Checkfire Ltd

With their projected growth they identified the need for a new workspace that could support their growing team and improve internal collaboration.

For 40 years Checkfire Ltd. have led the UK in fire safety solutions. Their success and growth prompted the need for a new workspace. Its purpose would be to accommodate their growing team in safety and comfort, and to promote a more collaborative approach among colleagues.

Checkfire selected Cobus to help bring their vision to life—a modern, flowing workspace to address

operational requirements while enhancing team dynamics and productivity. Spanning two floors, the project focused on optimising desk and meeting space whilst accommodating several bespoke rooms, including a photography studio and a showroom.
