Educational Strategy, Design, Fit out

Kings School Worcester

Cobus partnered with Kings School Worcester to transform their four-storey Sixth Form Centre into a modern, student-centred environment.

Through strategic design and purposeful delivery, we created a space that elevates both independent study, collaborative learning and day-to-day student life across classrooms and cafe areas.

For sixth form students, the centre needed to feel truly their own; a place that supports every aspect of their daily academic life. Our approach focused on fostering calm classrooms and dedicated study areas whilst introducing areas for student's to relax, recharge and socialise between lessons with vibrant breakout spaces and a café hub. The result is a balanced, future-ready environment that enhances

productivity, comfort and overall wellbeing while meeting the evolving needs of the next generation.

The school praised the outcome, noting how the new study pods and multipurpose rooms give students a dedicated place to think, work and connect, ultimately strengthening both their academic experience and mental wellbeing.

Redefining spaces with confidence

A space to inspire and motivate
